Reinhold, Java platform chief architect at Oracle, laid out the roadmap for Java 9, which could mean better modularity and new value types. Improved modularity could reduce app size and improve startup performance. New value types will make it easier to program arrays.

Java 9 promises modularity and new value types

Modularity is one of the techniques you can employ to manage and reduce this complexity. Java 9 introduces a new module system that makes modularization easier and more accessible. It builds on top of abstractions Java already has for modular development.
