Benefit-risk methodology. The European Medicines Agency's opinions are based on balancing the desired effects or 'benefits' of a medicine against its undesired effects or 'risks'. The Agency can recommend the authorisation of a medicine whose benefits are judged to be greater than its risks. In contrast, a medicine whose risks outweigh its benefits cannot be recommended for marketing.

Benefit-risk methodology | European Medicines Agency

Acknowledging 'the added value of patients in benefit-risk considerations - in that they enrich regulatory decisions by complementing them with the views of those directly affected by regulatory decisions', the European Medicines Agency (EMA) and the U.S. Food and Drug Administration (FDA) have launched a number of initiatives to start capturing patient views, values and preferences to inform benefit-risk assessment [12-16].
