Cloning cannabis lets you make dozens of (practically free) identical cannabis plants quickly! Save your favorite plants to grow again! Growers can take many clones of a single marijuana plant, and this is an easy way to get many plants that will grow the same way as the mother plant and produce buds with similar characteristics (smell, taste, potency, etc).

Picture Guide to Cloning Marijuana | Grow Weed Easy

For best results, learn how to flush your cannabis plants. Flushing your plants by removing any nutrients and salts improves the quality and taste of your final product. By simply draining your bubbler bucket reservoir and adding plain (pH neutral) water for two-three days before harvest, the plant will use all its existing nutrients contained in the stems, leaves and buds.
