secure a distributed workforce from a single platform entirely from the cloud, wherever you are.

### **Active Directory and LDAP Reimagined - JumpCloud**

Identity and Access Management (IAM) is an established part of IT. IAM is about controlling who has access to digital assets. As we move more and more into Cloud computing, IAM is taking on more importance. Cloud identity and access management is comparable to the traditional IAM we use on-premises, but with a few key differences.
