groundnuts, rapeseeds and mustard seeds. While the former is a Kharif crop, depending wholly upon reasonable but timely rainfall, the latter is a Rabi crop, fundamentally confined only to non-irrigated areas. As a result their production as well as productivity is subject to climatic variations and market hypotheses.

Field Crop (Kharif) - hpbiodiversity.gov.in

Field Crops (Rabi) 5 Lecture 01 Importance, area, production and productivity of major cereals, pulses, oilseeds, sugar crops, medicinal and aromatics and forage crops Importance of cereals Grains are generally classified as the seeds of cereal plants. They are characterized by their smallness, hardness and low water content.

Field Crops (Rabi) - AgriMoon

Kharif crops, monsoon crops or autumn crops are domesticated plants like rice that are cultivated and harvested in India, Pakistan and Bangladesh during the Indian subcontinent's monsoon season, which lasts from June to November depending on the area. Monsoon rains may begin as early as May in some parts of the Indian subcontinent, and crops are generally harvested from 3rd Week of September to October, again depending upon the region and the crops. Rice, maize and cotton are some of the major k
