Musculoskeletal Imaging and Pain Management. Musculoskeletal radiology is a rapidly evolving field in which specialists use advanced imaging techniques to diagnose arthritis, trauma, sports injuries, rheumatologic conditions, and bone tumors. Musculoskeletal radiologists also perform image-guided procedures and minimally invasive pain management therapies that often provide an alternative to surgery.

Musculoskeletal Imaging & Pain Management | Columbia Radiology

The earliest study of musculoskeletal issues of interventionalists was reported in 1992 when Moore et al surveyed 236 radiologists regarding back pain and use of lead aprons. Although the results were not statistically significant, back pain was reported by more than 50% of respondents who wore a lead apron for more than 10 hours per week.
