Volvo Engine Fan Problem

As such, if you stop the car when it is doing a regen, the fan stays on to cool it back down. The reason for this is on turbo cars, if you turn off when very hot, the residual heat in the turbo can over cook the oil. Oil that gets too hot can leave deposits which causes wear - in turbo this can attack the oil seals.

Fan running on | Volvo V40 Forums

The last 2 days about an hour after I arrive home from a 40 min back road commute, I've noticed that the blower on my 2000 Volvo S80(heater/AC) fan is running. When I put the key in and move it to the first position and then off, it turns the blower off. My check engine light has been on for a while but was last summer also and seems to go on and off depending on the amount of fuel in the ...
